To Whom It May Concern:

C&M Restoration has recently completed tuckpointing, repairing and sealing our bell tower. The entire project was done with great attention to even the smallest details. Research and consultation with an engineer prior to the work facilitated the restoration process. Original construction was in the early 1920's and a lot of thermal cracking had occurred over the years. This has now been properly restored and repaired as needed. The bell tower looks as good as new.

The people who worked on this project were courteous, careful, and professional in every way. It was especially good working with Bill Thomas on this project and when we were able to see up close some needed repairs that weren't planned, he found a way to work them in so that future problems with the masonry would be avoided. Most significantly, the quality of craftsmanship overall was impressive.

I highly recommend C&M Restoration to anyone needing quality workmanship in any kind of masonry restoration. It has been a pleasure working with C&M. I will be happy to provide further details if needed, and can be reached at the above phone number.
